Technical Information

Features

Type:
Acoustic Absorber
Absorption range: 315 Hz to 3150 Hz

Acoustic Class: C | (α_w) = 0,75

Available fire rates:
FG | Furniture Grade

Materials:
- Natural wood | Lacquered HMDF
- Marine grade plywood structural frame
- Calibrated cell acoustic foam

Four M6 Screw Thread receiver included on each panel.

Dimensions:

FG - LW | 595x1190x55mm | 3.52 Kg
FG - NW | 595x1190x55mm | 3.12 Kg

The latest addition to the Pro Audio and studio range, Orion is the culmination of extensive research into the optimisation of MLS sequences for calibrated acoustic absorption. Orion brings the distinct design of our flagship Logan diffuser to new horizons.

An array of Orion absorbers create areas with a distinct acoustic response, each calibrated to work at a certain frequency range. Using these Helmholtz-style absorption techniques boosts mid-low and mid range absorption, whilst the open areas of the panel are enough to guarantee high-frequency absorption. Orion is a great technical product, designed for the studio world, where each surface is critical - making sure that you get the best out of your studio.
