Technical Information

Myron E - Diffuser

High-Quality diffusion for any room.

Myron E - Diffuser

In spaces like recording control rooms, sound mastering rooms or other high fidelity listening environments where the sound quality is critical, controlling the bandwidth of diffusion is a priority. Myron E Diffuser was conceived and developed by Artnovion with a specific technical advantage, which allows it to perform way beyond what most of other sound diffusing products are able to deliver.

This EPS panel is available in 3 different colours, and is especially easy to install.
