### Specifications

FixArt Clip Metal  
FixArt Clip Plastic

FixArt Clip is a safe, simple mechanical fixing system compatible with the Artnovion absorber range. Using Artnovion's' patented frame, FixArt Clip simply slots into a hidden groove on the rear of the product. An additional flange allows you to place an additional security screw, for ceiling installation, or simply added safety. Once installed you can adjust the bracket to get perfect alignments. FixArt Clip allows for easy clip panels in and out - redesigning your room environment has never been easier. The product is supplied with a template that marks all the necessary screw positions. The product is available in two finishes - Galvanised steel (FixArt Metal) and sleek black plastic (FixArt Plastic). FixArt plastic is recommended for standard installations, whilst FixArt Metal complies to public sector building specifications and fire regulations.

*Artnovion Patent P. ( Acoustic panel with integrated frame system) & Frame design*
